

# COMING TO A WORKSTATION NEAR YOU...ProMapp!

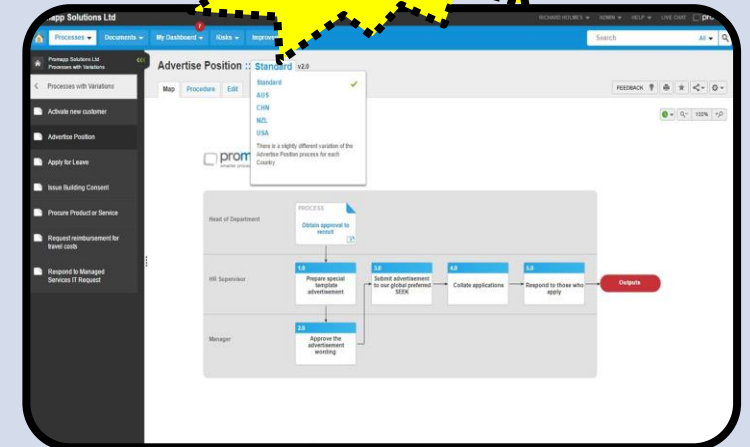

**What is ProMapp?**

**Why is it being introduced?**

**Who will be involved?**

*Promapp is an easy to use cloud based process management software for creating and storing business processes online.*

*Several local Councils across Australia and New Zealand are already using Promapp such as in NSW Northern Beaches Council, Port Stephens Council and Penrith City Council.*

*Currently, there are no/limited specific process mapping/improving tools and systems across the Council*

*There is also lack of standardisation with mapping of business processes and it leads to inconsistent practices.*

*It leads to time being wasted on duplicate process steps and unclear decision making.*

*ProMapp will be progressively implemented across Council.*

*10 process champions will work closely with the Business Improvement team to introduce Promapp in their respective business units.*

*Promapp will be accessible to all Council staff via an Intranet link from the home page. No password or sign in will be required.*

*Contact Judy Muir, in Business Improvement Office for more information*
